**13<sup>th</sup> Dessau Gas Engine Conference**  
15 and 16 May 2024 Dessau-Roßlau, Saxony-Anhalt, Germany

- # Dual Fuel
- # Fuel Share
- # H<sub>2</sub>-Readiness
- # Hydrogen
- # Ammonia
- # H<sub>2</sub> admixture
- # Retrofit
- # ...and what role will methanol play in the gas engine of the future?

**New Gas engines are like a rainbow – multicoloured!**

The hydrogen engine is on its way. However, the complex storage of hydrogen leads to the question of other fuels, which are currently being discussed as synthetic alternatives in the form of methanol and ammonia. The questions surrounding the different combustion processes differ depending on the fuel. In combination with the question of the „right“ application, whether off-road, on-road, marine or power, a colourful bouquet of possible solutions arises. The above concepts can also be combined if Fuel Share, Dual Fuel and Retrofit are requested in the future. In this context, it is important to remember that current fuels such as natural gas and biogas will continue to have a significant influence on the energy mix in the foreseeable future. At the 13<sup>th</sup> Dessau Gas Engine Conference, we would like to discuss with you this colourful mix of exciting questions concerning the gas engine, explore current trends and present the possible solutions. We are looking forward to your submission of presentations on our main topics with a strong focus on the alternative fuels.

Your WTZ-Team

Dr.-Ing.  
Christian Reiser

Karsten Stenzel

**General information**

**Venue**

Veranstaltungszentrum Golfpark Dessau  
Junkersstraße 52, 06847 Dessau-Roßlau, Germany

**Conference languages**

The conference languages are German and English with simultaneous translation.

**Participants**

The event is aimed at engineers and technicians in the industry, research and teaching, dealing with the optimization of gas engines and their components. We bring together engine manufacturers, suppliers and development experts to exchange ideas about new trends and discuss the future of the gas engine.

**Exhibition/Sponsoring**

The conference will be accompanied by an exhibition which will give you the chance to present products and services of your company. We can offer individual sponsoring and exhibition packages that will be tailored to your specific needs.
